DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08 August 2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Reich et al. (US 5,570,511).

Reich discloses all the recited elements of the invention including:

- a) a housing (12);
- b) a motor (at 12);
- c) a foot (22);
- d) a saw blade depth adjustment detent mechanism including a saw blade depth detent (84) biased toward a second member (50) having a plurality of spaced saw blade depth recesses (58) wherein the saw blade depth

Art Unit: 3724

adjustment detent mechanism is pivotally interconnecting the foot to the housing (at 28) wherein the saw blade depth detent resist vertical movement of the depth detent mechanism in either direction;
e) a bevel angle adjustment detent mechanism (at 32).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 12, and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reich in view of Lewin et al. (US 6,691,418).

Reich discloses the invention substantially as claimed except for a bevel angle detent and an arcuate member defining a plurality of spaced bevel angle recesses. Lewin discloses a bevel angle adjustment mechanism including a bevel angle detent (48) and an arcuate member (50) defining a plurality of spaced bevel angle intervals (54). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Reich with a bevel angle adjustment mechanism as taught by Lewin as an alternative means for adjusting bevel angles. Regarding claim 20, a spring (56 of Lewin).

Allowable Subject Matter

6. Claims 13-19 are allowed.

Response to Arguments

Art Unit: 3724

7. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Friday 9:00-3:30.
